

Jason Feng

Rocklin, California [jasonfeng365.github.io](https://github.com/jasonfeng365) www.linkedin.com/in/jasonfeng365 jasonfeng365@gmail.com

M.S. Computer Science student at UCLA specializing in backend, full-stack, mobile, and embedded software development
ICPC Pacific Northwest judge; 2025 North American Championship contestant; 1st place, 2023 Division 2 PacNW ICPC
Experienced in cloud services, automation, and building end-to-end software systems from prototype to deployment

EXPERIENCE

Software Engineering Intern

Fusion Cloud, Oracle AI Agent Studio, Oracle ATLAS

Oracle Redwood Shores, CA | June 2026 – September 2026

- Developed an automated OCR and business-summary workflow in AI Agent Studio, streamlining sales data entry
- Engineered an evaluation metric for AI-driven CI/CD repair agents, measuring token usage, cost, and bug-repair quality
- Designed a framework for secure AI with policy, permission, and user-approval systems to evaluate risky agent actions

Judge **Codeforces/Polygon, C++, LaTeX**

International Collegiate Programming Contest Remote | May 2025 – Present

- Co-wrote annual [regional ICPC contests](#) from a pool of [150+ original coding challenges](#) for 450+ collegiate contestants
- Engineered problem-specific input generators and validators to construct adversarial test cases to stress-test submissions
- Independently authored [biannual competitions for Sierra College](#); led student teams to host [annual UC Davis contests](#)

Teaching Assistant - Software Construction

React + Node.js Fullstack Development

UCLA Los Angeles, CA | September 2026 – Present

- Lead weekly discussion sections for 60 students, reinforcing software fundamentals through React, Node.js, and Python
- Hold office hours and grade assignments and exams, providing individualized technical and conceptual support

Android Development Intern

Android, GCP, tus, Kotlin, Node.js, Express, K8

AgScout.ai Davis, CA | June 2025 – September 2025

- Developed an Android background service for resumable overnight transfers from Android devices to GCS
- Built reliable large-file transfers with resumability, chunking, retries, network monitoring, and authentication
- Implemented upload scheduling based on charging and high-speed network availability, eliminating manual supervision

Embedded Systems Research Assistant

Qt Creator, Doxygen, Lambda, API Gateway

Laboratory for Embedded and Programmable Systems Davis, CA | July 2024 – February 2025

- Extended a Qt signal-processing GUI to visualize frequency-domain data using Fast Fourier Transforms
- Built a Qt-based iPhone application to wirelessly synchronize data with a desktop Qt application over websocket

PROJECTS

CANIS

Spring, Gradle, OCI, Google Apps Script, STOMP

Contest Administration, Notifications, and Information System Project deployed at UC Davis + Sierra | July 2024 - Present

- Independently developed a full-stack Spring web app automating contest administration for [UC Davis](#) and [Sierra College](#)
- Deployed and maintained REST and STOMP websocket server on OCI for signup data and schedulable notifications

CycleGuard

Flutter, Spring, Cloud Run, DynamoDB

Gamified embedded smart helmet and smartphone interface UC Davis Capstone Project | January 2025 - June 2025

- Collaborated with seven peers to develop a cross-platform mobile app integrating with a custom-built smart helmet
- Designed and implemented a [Spring backend](#), including API and application logic, deployed on Google Cloud Run

Build Your Own Labyrinth

C, Flask, AWS IoT, Bootstrap, Vue.js, Fabric.js

2.5D isomorphic maze game for TI LaunchPad microcontroller UC Davis Embedded Systems | May 2024 - June 2024

- Built a [2.5D isomorphic rendering and physics engine](#) from scratch in C for a TI LaunchPad with a 128×128 display
- Developed a full-stack level creation pipeline connecting an AWS IoT REST API and Fabric.js [editor/viewer](#)

EDUCATION

UCLA Samueli School of Engineering

Los Angeles, CA

Pursuing Computer Science, M.S.

September 2025 - June 2027

UC Davis College of Engineering

Davis, CA

Sole recipient of the [2025 Computer Science and Engineering Outstanding Senior award](#)

September 2023 - June 2025

Computer Science and Engineering, B.S with highest honors

SKILLS

LANGUAGES | Java, Kotlin, Python, Dart, C, C++, C#, Go, HTML, JavaScript, ARM, PSQL

LIBRARIES | Spring, Flask, PyTorch, Keras, TensorFlow, Flutter, Qt, Unity, Bootstrap, Vue.js, Node.js, Axios, Fabric.js, Pi

TECHNOLOGIES | Gradle, Git/GitHub, AWS, GCP, OCI, Doxygen, Docker, Selenium, Android
