jasonfeng365@gmail.com

Backend developer, mobile and embedded engineer, and competitive programmer, pursuing a M.S. in Computer Science at UCLA
ICPC Pacific Northwest judge; 2025 North American Championship contestant, first place at 2023 Division 2 PacNW ICPC
Experience in fullstack and mobile development and task automation, along with problem solving and algorithm design

EXPERIENCE

Software Engineering Intern

Oracle

Fusion Cloud, AI Agent Studio, A2A, MCP

Redwood Shores, CA | June 2026 – September 2026

- Developing image- and audio-to-text parsing workflows for integration within Fusion Cloud sales applications
- Designing a framework for agent-to-agent role assignment for privileged data access, while maintaining least-privilege

Judge / Competitive Programming Problemsetter

International Collegiate Programming Contest

Codeforces/Polygon, Markdown, LaTeX

Remote | May 2025 – Present

- Co-wrote annual Pacific Northwest ICPC problem sets for 450+ college contestants from 150+ self-written challenges
- Singlehandedly wrote biannual educational Sierra College contests; led student teams to host annual UC Davis contests
- Developed a custom contest administration system to track contestants' progress, and to alert if a contestant is stuck

Android Development Intern

AgScout.ai - Agricultural Scout

Android, GCP, tus, Kotlin, Node.js, Express, K8

Davis, CA | June 2025 – September 2025

- Developed an automatic file uploader for resumable overnight transfers from Android phone to Google Cloud Bucket
- Ensuring data is verified with chunk- and file-level checksums, and that no data is lost through many layers of failsafing
- Eliminates manual upload work and supervision; automatically activates while charging and with high-speed internet

Embedded Systems Research Assistant + Intern

Laboratory for Embedded and Programmable Systems

Qt Creator, Doxygen, Lambda, API Gateway

Davis, CA | July 2024 – February 2025

- Refined a prototype Qt signal processing GUI to read in frequency-domain using Fast Fourier Transforms
- Documented a Qt Creator codebase for a medical transabdominal fetal oximetry system using Doxygen
- Built and demonstrated a Qt iPhone application to wirelessly update a desktop Qt application using websockets

PROJECTS

CANIS

Contest Administration, Notifications, and Information System

Spring, Gradle, OCI, Google Apps Script, STOMP

Personal project | July 2024 - Present

- Fullstack Java Spring application for automation of UC Davis's and Sierra College's competitive programming contests
- Integration with Codeforces and HackerRank platforms into standardized submission data for push notifications
- Cloud-hosted public REST API, web interface for contest creation and management, and self-schedulable notifications

CycleGuard

Gamified embedded smart helmet and smartphone interface

Flutter, Spring, Cloud Run, DynamoDB

UC Davis Capstone Project | January 2025 - June 2025

- Collaborated with seven peers to develop a cross-platform Flutter smartphone application with a self-made smart helmet
- Wrote by myself and documented a well-maintained Spring backend following principles of clean code, hosted on GCP

Build Your Own Labyrinth

2.5D isomorphic maze game for TI LaunchPad microcontroller

C, Flask, AWS IoT, Bootstrap, Vue.js, Fabric.js

UC Davis Embedded Systems | May 2024 - June 2024

- Wrote a 2.5D isomorphic rendering and physics engine in C from scratch, for a microcontroller and a 128x128 OLED
- Connected an AWS IoT Rest API and a Fabric.js level editor and viewer with a Flask backend for a full-stack application
- Built the class's best project in Spring 2024; offered an embedded systems internship position with my project teammate

EDUCATION

UCLA Samueli School of Engineering

Pursuing Computer Science, M.S.

Los Angeles, CA

September 2025 - June 2027

UC Davis College of Engineering

Sole recipient of the 2025 Computer Science and Engineering Outstanding Senior award

Computer Science and Engineering, B.S with highest honors

Davis, CA

September 2023 - June 2025

SKILLS

LANGUAGES | Java, Kotlin, Python, Dart, C, C++, C#, HTML, JavaScript, ARM, PSQL

LIBRARIES | Spring, Flask, PyTorch, Keras, TensorFlow, Flutter, Qt, Unity, Bootstrap, Vue.js, Node.js, Axios, Fabric.js

TECHNOLOGIES | Gradle, Git/GitHub, AWS, GCP, OCI, Doxygen, Docker, Selenium, Android
